Dear Author:

I write to you today to encourage you to submit a review or experimental study to my special *supplemental issue* on **Mitochondrial Dysfunction in Alzheimer's Disease** that will be published in the *Journal of Alzheimer's Disease* (JAD; editor-in-chief, Dr. George Perry).

Please consider submitting your manuscript in what I believe will be a timely and very high profile supplemental issue. The deadline for submissions is February 9th.

Authors of accepted articles will pay 50% of the publication fee (€300/US\$350). We do not have set limits for length but most articles are 20-30 pages long (double spaced).

Your submitted article will be peer-reviewed and instructions for authors can be found at: <https://www.j-alz.com/submission>. Please direct your submission to the journal's online submission site (<https://mstracker.com/submit1.php?jc=jad>). Be sure to mention the name of the special issue and my name in your cover letter. Our target publication date is in the Fall of 2019 or sooner.

Thank you for considering JAD.

Sincerely,

Benedict C. Albeni, PhD, BCMAS, CRQM
Associate Editor, Journal of Alzheimer's Disease (JAD)
