## Patient Partners Leadership Training

**Who?** Patient Advocates and Patient Partner Leaders from industry and other sectors who are interested in engaging as equal partners in exploration, discovery, and creation of roles as leaders in all phases of the drug lifecycle. Limited to 30 participants.

**What?** This program will enhance the capabilities of patients, patient advocates, and various stakeholder groups that are involved in drug development and access to partner effectively throughout all phases of the drug lifecycle from drug development to real-world management.

**Where?** Virtual, 2-hour live sessions (bi-weekly) with interactive small group capabilities that will include structured opportunities comprised of expert presentations from multiple sectors and post-session discussions and written assignments.

**Why?** Partnering with patients has transformed how drugs are discovered, developed, and made available. We have created a structured program with interactive opportunities, expert presentations, panel discussions, case studies, simulations, and deliberate dialogues. Patient advocates and other stakeholders will engage as equal partners in exploration, discovery, and creation of roles as leaders in a variety of patient partner situations.

**When?** From September 18, 2020 (includes a year-end holiday break) to February 5, 2021

For more information: [Patient Partners Leadership Training Overview](#)

**Registration:** Spots are limited and will be accepted to ensure a variety of affiliations and perspectives. To register, please submit an application through this [link](#).
