

# Faces of Mito

## TANNER'S STORY

*The charming mito warrior*

7-year-old Tanner has always been a charmer, but his health was put into jeopardy when he was diagnosed with Leigh's Disease at the age of three. Through further testing, he was confirmed to have mitochondrial complex I deficiency with Leigh like diseases. Tanner was given two years to live, but he has been defeating the odds ever since. He never stops showing this ugly disease whose boss! Speech, mobility, and everyday functions may have been taken away, but the smile on this little man's face shows just how strong this Mito Warrior he is!
