**Thank you for your interest in the REN001 study
with nuclear DNA primary mitochondrial myopathy (PMM)**

M.A.G.I.C Clinic is conducting a study using an investigational medication, called REN001, in people with nuclear DNA (nDNA) PMM. The purpose of this study will be to assess the safety and efficacy of REN001. Please see below to determine if you are eligible to take part in the study:

- ❖ Be willing to provide a blood sample at the Screening visit to check your kidney and liver function and glucose and general health (using a blood test)
- ❖ How you were diagnosed with nuclear DNA primary mitochondrial (PMM) and how treatment was started. (a copy of the genetic results or biopsy report)
- ❖ The age of the person interested in being part of the study (must be 18 years of age or older)
- ❖ Person below 25 years must provide wrist radiograph to determine bone growth plate closure.

Please note that official study visits will be conducted at M.A.G.I.C Clinic 215-971 64 Ave NE, Calgary AB, Canada T2E 7Z4.

If you would like more information on clinical trials for PMM visit the website <https://clinicaltrials.gov/>

Please feel free to contact us with any questions at research@magiccalgary.ca

Warm regards,

Aneal Khan, MSC, MD, FRCPC, FCCMG
